

Marking Scheme
Strictly Confidential
(For Internal and Restricted use only)
Senior Secondary School Supplementary Examination, 2024
SUBJECT NAME: PHYSICAL EDUCATION (048) (Q.P. CODE 75/S)

General Instructions: -

1	You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems, which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2	“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under various rules of the Board and IPC.”
3	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In class-XII, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.
4	The Marking scheme carries only suggested value points for the answers These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5	The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6	Evaluators will mark (√) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓) while evaluating, which gives an impression that answer is correct, and no marks are awarded. This is most common mistake, which evaluators are committing.
7	If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.
8	If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
9	If a student has attempted an extra question, answer of the question deserving more

	marks should be retained and the other answer scored out with a note “ Extra Question ”.
10	No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
11	A full scale of marks _____ (example 0 to 80/70/60/50/40/30 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
12	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
13	Ensure that you do not make the following common types of errors committed by the Examiner in the past:- • Leaving answer or part thereof unassessed in an answer book. • Giving more marks for an answer than assigned to it. • Wrong totaling of marks awarded on an answer. • Wrong transfer of marks from the inside pages of the answer book to the title page. • Wrong question wise totaling on the title page. • Wrong totaling of marks of the two columns on the title page. • Wrong grand total. • Marks in words and figures not tallying/not same. • Wrong transfer of marks from the answer book to online award list. • Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.) • Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
15	Any unassessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16	The Examiners should acquaint themselves with the guidelines given in the “ Guidelines for Spot Evaluation ” before starting the actual evaluation.
17	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
18	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

General instruction

- a. The marking scheme carries only suggested value point for the answers.
- b. These are only guidelines and do not constitute the complete answer.
- c. The student can have their own expression and if the expression is correct, the marks be awarded accordingly
- d. The candidates would be permitted to obtain a photocopy of the answer book on request on payment of the prescribed processing fee. All evaluator /Additional head examiners/Head examiners are once again reminded that they must ensure that evaluation is carried out as per value point for each answer as given in the marking scheme.
- e. All Head examiners/Additional head examiners/Evaluators are instructed that while evaluating the answer book if the answer found to be totally incorrect, (X) should be marked on the incorrect answer and awarded '0' marks

Physical Education (Theory)**Class – XII****Max. Marks: 70**

Q.NO	ANSWER	MARKS
1.	(D) 16–21 years	1
2.	(C) Helps to improve self-esteem	1
3.	(C) Extraversion	1
4.	(C) Increase in muscle temperature	1
5.	(D) Sodium	1
6.	(A) 17	1
7.	(C) I-2, II-4, III-1, IV-3	1
8.	(B) Katichakrasana (For Visually Impaired Candidates only) (D) Katichakrasana	1
9.	(B) Body Mass Index Test	1
10.	(D) Ballistic method	1
11.	(C) Eight	1
12.	(B) 20 inches	1
13.	(B) Finance	1
14.	(D) Mandukasana	1
15.	(B) Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of the Assertion (A).	1
16.	(B) Both Assertion (A) and Reason (R) are true and Reason (R) is not the correct explanation of the Assertion (A).	1
17.	(A) Vitamin-B	1
18.	(B) Side Roll	1
	Section-B	
19. Ans.	Briefly explain ‘Health Run’. Health runs are generally conducted for the purpose of improving the health standards in society and creating awareness about the importance of physical activities for maintaining good health or for raising charity. The purpose of the runners is not to win, but to participate in the events. To get its full impact, a large number of registrations are required. There is no age bar for participants. It is not a professional race so there is no need to run a long distance. These runs are conducted by NGOs or health departments to spread awareness about health related issues.	2

20. Ans.	Briefly explain 'R.I.C.E.' therapy to manage soft tissue injuries. Soft tissue injuries like sprain and strain can be managed by giving first aid. R.I.C.E is the therapy that helps to reduce pain and swelling. The principle of R.I.C.E denotes: R- Rest and protect the injured or sore area. I - Ice or cold packs are used as soon as possible. C - Compression, or wrapping the injured or sore area with an elastic bandage. E - Elevate the injured or sore area.	$\frac{1}{2} \times 4 = 2$
21. Ans.	Explain the procedure of Dhanurasana as a preventive measure for Asthma. Procedure of Dhanurasana: 1. Take prone position, legs together, and hands straight by the side of the thighs, chin resting on the ground. 2. Fold the legs at the knee and bring them to the thighs. Knees must remain together. 3. Bring hands backward and hold the toes of respective legs with the thumb and forefinger of the respective hands. 4. Raise legs up a bit and simultaneously raise the head and chest. 5. Holding the toes, pull the legs towards the ears. Gaze in front. 6. While returning to the original position loosen your hands, take legs backward, let the thighs touch the ground, leave the toes and ultimately bring the legs and hands to the first position.	2
22. Ans.	What do you understand by Macro-cycle? Macro Cycle: The duration of this cycle is 3 to 12 months and it is, thus, considered the most extended cycle of training. A macrocycle comprises of several mesocycles; the last mesocycle ensures recovery and realization for a smooth transition to the following macro-cycle. The purpose of the macrocycle is to enable the sportsperson to improve the performance capacity and put up an optimal performance, at a specific time, during the competition.	2
23. Ans.	Enlist four non-nutritive food items. - Fibre or Roughage - water - Colour Compounds - Flavour Compounds - Plant compounds - Artificial sweeteners - Preservatives - Spices - coffee (Enlist any 4 relevant components)	$4 \times \frac{1}{2} = 2$

24.	Suggest any two strategies to make physical activities accessible for CWSN.	1+1=2
Ans.	Any two strategies from the following: • Medical check up • To Create Specific Environment • To assess physical and mental ability • To assess the interest of child • Plan activity as per need • Plan different strategies for instruction • Modified Rules • Use of modified equipment • Plan for implementation from easy to difficult • Extra Care or Concern for safety • Plan for additional support of parents and trained assistants (any 2 relevant strategies)	
Section-C		
25.	Briefly explain the concept of Talent Identification in sports.	3
Ans.	Talent Identification is the process, by which children are encouraged to participate in the sport they are most likely to succeed, based on selected parameters. These parameters are designed to predict performance capacity, considering the child's current level of fitness and maturity. Recognizing participants with the potential at an earlier age to become elite performers in the future. For the talent identification process Physiological, Physical Fitness, Psychological, and Technical Components are taken into consideration. For the identification, various methods such as drills, test batteries, electronic gadgets, parameters, standard norms, performance and other techniques are adopted. The first stage of the process could occur between the ages of 10 and 12, using essential field tests that are easy to administer. The second phase of the selection procedure could occur between 13 and 16. Again, the tests should be carried out in schools and be easy to administer. Those selected at this stage would then be invited to undergo more sophisticated tests, administered by specialists in the area or state centers, consisting of field tests and laboratory tests depending on the facilities available. Finally, those selected should be allocated to elite junior programs on an event group basis.	
26.	Explain the purpose and procedure of 'Flamingo Balance Test'.	1+2=3
Ans.	Purpose: Ability to balance successfully on a single leg. This single leg balance test assesses the strength of the leg, pelvic, and trunk muscles as well as Static balance. (for age group 5-8 yrs., classes 1-3)	

	Procedure: Stand on the beam. Keep balance by holding the instructor's hand (if required to start). While balancing on the preferred leg, the free leg is flexed at the knee and the foot of this leg held close to the buttocks. Start the watch as the instructor lets go of the participant/subject. Pause the stopwatch each time the subject loses balance (either by falling off the beam or letting go of the foot being held). Resume over, again timing until they lose balance. Count the number of falls in 60 seconds of balancing. If there are more than 15 falls in the first 30 seconds, the test is terminated.	
27. Ans.	Elucidate any three factors, affecting projectile trajectory. Factors that affect projectile trajectory: 1. Angle of projection- When it is 45 degree, maximum horizontal distance is achieved 2. Initial velocity – The horizontal range depends on initial velocity. Greater the initial velocity applied on the projectile during release, greater horizontal distance is achieved. 3. Gravity –It is the force of attraction exerted by the earth. The greater the weight of an object, the greater is the influence of gravity upon it. Gravitational pull stops the upward movement of an object resulting into decreased height of projectile. 4. Air resistance –Surface area, speed, surface of object and mass of object all have an impact on air resistance. 5. Spin- It changes the path of projectile. The amount and direction of spin directly affects the distance that projectile travels because the air pressure acts on it. (any 3 relevant factors)	1+1+1=3
28. Ans.	Enlist any two tests to measure functional fitness of senior citizens and describe the procedure of any one of them. 1. Chair Stand Test for lower body strength 2. Arm Curl Test for upper body strength 3. Chair Sit and Reach Test for lower body flexibility 4. Back Scratch Test for upper body flexibility 5. Eight Foot Up and Go Test for agility 6. Six Minute Walk Test for aerobic endurance (Enlist any 2 tests from the above list and write the procedure for any one) Chair Stand Test: Procedure: The chair should be placed against the wall or somewhere, where it gets stabilized. Initially, the individual will sit on the chair, back straight, arms crossed and feet firmly on the floor, shoulder width apart. On the command “Go” the individual will stand up completely, then return back to the initial position. This will be counted as one stand. The	1+2=3

	individual should be motivated to do maximum stands in 30 seconds.	
29. Ans.	Describe three food myths and their related facts. 1.<u>Food myth</u> The fewer the carbohydrates, healthier you are- <u>Related facts</u> Choosing the healthiest carbohydrates, especially whole grains, is important for health and well-being. 2.<u>Food myth</u> Oils/Margarine have fewer calories than Ghee/butter- <u>Related facts</u> Ghee/Butter and Oils/ Margarine have about the same amount of calories. 3.<u>Food myth</u> Apples and brinjals are rich in iron because they turn brown when cut- <u>Related facts</u> They are an excellent source of fibre but not of iron. 4.<u>Food myth</u> Milk should be avoided after eating fish- <u>Related facts</u> Drinking milk right after consuming fish causes skin disease like leukoderma, or white patches on skin. This is not true. 5.<u>Food myth</u> Drinking water in between meals affects digestion- <u>Related fact</u> Drinking water simply fills up stomach and as a result, one tends to eat less, which is especially good when someone is trying to lose weight. (or any other three relevant myths with their related facts)	1+1+1 =3
30. Ans.	Describe any two methods to develop strength, by giving suitable examples from sports. Methods to develop strength: Isometric Exercise: These exercises are not visible as there is no direct movement. Therefore, isometric exercises cannot be observed. In these exercises, work performed cannot be seen directly, like pushing a wall. There is no change in the muscle length when such exercises are done. These exercises need less time and equipment and can be performed practically anywhere and everywhere. e.g. Planks, Flexed Arm Hang, Wall Sit, Low Squat, Calf Raise and	1½+1½ =3

	Hold, Glute Bridge etc. Isotonic Exercise: In these exercises movements can be seen directly. Isotonic exercises result in toned muscles and increased muscle length. Examples of isotonic exercises include running and jumping on the spot, weight training exercises, and calisthenics exercises. Isokinetic Exercise: These exercises are performed on specially designed machines. In Isokinetic contraction, the muscles apply maximal force throughout the range of motion around the joint. Example: Brisk Walking on a Treadmill, cycling on an exercise bike, Rowing, etc. (Any 2 methods explained with any relevant example)	
	Section-D	
31.		$4 \times 1 = 4$
Ans.	(a) League Tournament is also known as <u>Round Robin</u>. (b) Identify the method used in the above fixture. Cyclic Method (c) How many rounds will be played if 6 teams are participating in a league tournament? 5 Rounds (d) How many matches are played in the above fixture? 21 matches (for visually impaired candidates only) What do you understand by intramural and extramural sports? Write any two objectives for each. <u>Intramural</u>: The meaning of the word ‘intramural’ is “within the walls”. In context of sports, it refers to a tournament conducted within the walls of a single institution/ school/ community. Intramural competitions/tournament are conducted within players of one institution. <u>Objectives of Intramural Tournaments</u>: • To encourage mass participation in sports in an institution. • To focus on all-round development of children. • To develop values like fair play, respect, friendship through sports. • To provide first opportunity to compete in a controlled environment. • To focus on fitness, wellness and health aspects of children. • To promote curricular integration through sports. • To help children to develop personality (first stage of leadership, control of emotions, cooperation etc.) <u>Extramural</u>: The word ‘extramural’ means “outside the boundary or walls”. In Sports Extramural Tournaments are the tournaments conducted outside or beyond the walls of the organising unit that may be	$2 + 2 = 4$

	a school/college/institution. Such tournaments are conducted between two or more players/teams of different schools/colleges/ institutions. <u>Objectives of Extramural Tournaments:</u> • To achieve high performance at highest level of the tournament. • To develop the feeling of integration with other institutions • To provide opportunities for choosing a career in sports • To promote social, cultural, economic development through sports. (explanation with any 2 objectives for each)	
32. Ans.	Study the picture given below (a)The above logo incorporates four colours, red, blue, yellow and <u>Green.</u> (b)The logo of Deaflympics was designed in the year <u>2003.</u> (c) In the above logo, the hand shapes, “Ok”, “Good” and “<u>Great</u>” “overlap each other. (d) The first Deaflympics were held in the year <u>1924</u> in Paris. OR First Deaflympics Games were also known as <u>International Silent Games.</u> (For Visually Impaired Candidates only) Explain any four advantages of physical activities for children with special needs. Advantages of physical activities for children with special need. 1.Physical improvement 2.Mental improvement 3.Increase self esteem 4. Reduce the level of stress, Anxiety and Depression 5. Reduce the risk of health complications. 6. Improved social interaction 7. Improved cognitive skills 8. Improved emotional and psychological health 9. Mode of recreation and fun 10. Channelizing the surplus energy (Any 4 relevant points explained)	4 x1= 4 4x1=4
33. Ans.	(a)Identify the injury shown in picture ‘A’. Sprain (b)The injury shown in picture ‘A’ occurs due to overstretching of Ligaments. (c)Identify the type of fracture shown in picture ‘B’. Oblique OR Fracture is a <u>Hard tissue</u> injury. <u>Dislocation</u> is a joint injury that forces the ends of bones out of	4 ×1= 4

	position. (For Visually Impaired Candidates only) Explain any two soft tissue injuries. Abrasion: Injuries most commonly occur due to moving contact with a rough surface, causing a grinding, or rubbing away of the upper superficial layers of the epidermis. Contusion: It is the type of hematoma, which refers to any collection of blood outside of a vessel. When a part of the body is struck by enough force to crush underlying muscle fibres and connective tissue without breaking the skin, a contusion may occur. Laceration: The irregular tear-like wounds caused by some blunt trauma. Mostly, laceration is the result of the skin hitting an adjacent object, or an object hitting the skin with force. Strain: A strain is an injury to either a muscle or a tendon generally caused by overuse, force, or stretching. Sprain: is the stretching or tearing of ligaments, the fibrous tissue that connects bones in the joints. A sprain occurs when you overextend or tear a ligament while surely stressing a joint. The most common location for a sprain is in your ankle. Incision: An incision is a cut made into the tissues of the body to expose the underlying tissue, bone or organ. Can be caused by a clean, sharp-edged object – such as a knife, razor or glass splinter.	2+2=4
	Section-E	
34. Ans.	Explain any two postural deformities and suggest their corrective measures. Postural Deformities 1. Knock knees 2. Flat foot 3. Round shoulder 4. Bow legs 5. Lordosis 6. Kyphosis 7. Scoliosis 1. Knock knees Knock knees is a postural deformity in which the legs are bent inward and knees strike each other while walking or running and there is a wide gap between the ankles. It is also known as Genu Valgum. Corrective measures: 1. Horse riding 2. Perform padmasana and gomukhasana 3. Outward walking	2½+2½ =5

	4. Keep a pillow between the knees and stand erect for some time. (Or any other relevant measure) 2.Flat foot Flat foot is also known as pes planus or fallen arches. When the arch of the foot is lesser than normal, it is known as flat foot. Corrective measure: 1.Walk bare footed over the sand 2. Perform rope skipping 3. Picking up marbles with toes 4. Perform Adhomukhsavasana and vajrasana. (Or explanation and corrective measure of any 2 enlisted postural deformities)	
35. Ans.	Define Equilibrium. Explain Static and Dynamic Equilibrium by giving suitable examples from sports. Equilibrium: Equilibrium is defined as a state of balance or a stable situation where opposite forces cancel each other out and where no changes are occurring. Two types of equilibrium are: 1.Static equilibrium A state when a body is at rest or completely motion less. Example: 1. Performing handstand in gymnastics 2. Stance maintained by the batsman in crickets. 3. On the starting block by the sprinter. 4. Wide stance maintained by the wrestler. 5. A shooter maintains a steady stance and grip while aiming at a target. 2. Dynamic equilibrium: A state when the body or an object is moving with a constant velocity with no change in speed or direction is known as dynamic equilibrium. Example: 1. Cyclist balance while riding 2. Surfer balancing on a moving surfboard 3. A basket ball player maintaining balance while dribbling and shooting 4. A figure skater maintaining balance during footwork sequences. 5. A diver maintaining balance during the take off	1+2+2 =5

36.	What do you understand by Obesity? Explain the procedure of any two asanas to manage obesity.	1+4=5																																		
Ans.	Obesity is defined as an abnormal or excessive fat accumulation that may impair health. Obesity is a medical condition when the body of a person contains 20% or more fat as compared to ideal weight. According to WHO, if an individual’s BMI is 30 or higher, then the person is in the obese category. (Or similar explanation) <table> <tr> <th>BMI LEVELS</th><th>CATEGORIES</th></tr> <tr> <td>Less Than 18.5</td><td>Underweight</td></tr> <tr> <td>18.5 to 24.9</td><td>Normal</td></tr> <tr> <td>25 to 29.9</td><td>Overweight</td></tr> <tr> <td>30 to 34.9</td><td>Class I Obesity</td></tr> <tr> <td>35 to 39.9</td><td>Class II Obesity</td></tr> <tr> <td>40 to 49.9</td><td>Class III Obesity</td></tr> <tr> <td>50+</td><td>Class IV Obesity</td></tr> </table> <table> <tr> <td></td><td></td><td></td></tr> <tr> <td><u>Tadasana,</u></td><td><u>Katichakrasana,</u></td><td><u>Pawanmuktasana,</u></td></tr> <tr> <td></td><td></td><td></td></tr> <tr> <td><u>Halasana,</u></td><td><u>Pachimottasana,</u></td><td><u>Ardha – Matsyendrasana,</u></td></tr> <tr> <td></td><td>MATSYASANA </td><td></td></tr> <tr> <td><u>Ushtrasana,</u></td><td><u>Matsayasana</u></td><td><u>Dhanurasana</u></td></tr> </table>	BMI LEVELS	CATEGORIES	Less Than 18.5	Underweight	18.5 to 24.9	Normal	25 to 29.9	Overweight	30 to 34.9	Class I Obesity	35 to 39.9	Class II Obesity	40 to 49.9	Class III Obesity	50+	Class IV Obesity				<u>Tadasana,</u>	<u>Katichakrasana,</u>	<u>Pawanmuktasana,</u>				<u>Halasana,</u>	<u>Pachimottasana,</u>	<u>Ardha – Matsyendrasana,</u>		MATSYASANA 		<u>Ushtrasana,</u>	<u>Matsayasana</u>	<u>Dhanurasana</u>

	MATSYASANA 																																			
<u>Ushtrasana,</u>	<u>Matsayasana</u>	<u>Dhanurasana</u>																																		

(Procedure of any 2 Asanas from the image provided above)

37.	Define Motivation. Differentiate between Intrinsic and Extrinsic Motivation. Ans. Motivation can be defined simply as the direction and intensity of effort. OR Motivation is a process of inspiring, guiding the organism to move in a particular direction. OR Motivation is the process of arousing action, sustaining the activities in progress and regulating the patterns of activity. (any other relevant definition) Difference between Intrinsic and Extrinsic Motivation <table border="1"> <thead> <tr> <th></th><th>Intrinsic Motivation</th><th>Extrinsic Motivation</th></tr> </thead> <tbody> <tr> <td>Definition</td><td>Driving force to pursue an action for fun, joy or any other inner satisfaction</td><td>Driving force to pursue an action due to reward, trophy, money, promotions or praise</td></tr> <tr> <td>Factors</td><td>Internal factors like joy, enjoyment</td><td>External factors like reward, promotion, praise</td></tr> <tr> <td>Method</td><td>Goal Setting strategies, Family and Community support</td><td>Associating success with future benefits, awards, promotions</td></tr> <tr> <td>Benefits</td><td>Long term benefit of maintaining a behaviour</td><td>Helpful to initiate or create a drive towards a desired behaviour when internal factors are missing.</td></tr> </tbody> </table>		Intrinsic Motivation	Extrinsic Motivation	Definition	Driving force to pursue an action for fun, joy or any other inner satisfaction	Driving force to pursue an action due to reward, trophy, money, promotions or praise	Factors	Internal factors like joy, enjoyment	External factors like reward, promotion, praise	Method	Goal Setting strategies, Family and Community support	Associating success with future benefits, awards, promotions	Benefits	Long term benefit of maintaining a behaviour	Helpful to initiate or create a drive towards a desired behaviour when internal factors are missing.	1+2+2 =5
	Intrinsic Motivation	Extrinsic Motivation															
Definition	Driving force to pursue an action for fun, joy or any other inner satisfaction	Driving force to pursue an action due to reward, trophy, money, promotions or praise															
Factors	Internal factors like joy, enjoyment	External factors like reward, promotion, praise															
Method	Goal Setting strategies, Family and Community support	Associating success with future benefits, awards, promotions															
Benefits	Long term benefit of maintaining a behaviour	Helpful to initiate or create a drive towards a desired behaviour when internal factors are missing.
