

Marking Scheme Strictly Confidential (For Internal and Restricted use only) Sr. Secondary School Supplementary Examination, 2025 SUBJECT NAME : PHYSICAL EDUCATION (048) (Q.P. CODE 75/S)	
General Instructions: -	
1.	You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2.	“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, evaluation done and several other aspects. Its leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in Newspaper/Website etc. may invite action under various rules of the Board and IPC.”
3.	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In class-XII, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.
4.	The Marking Scheme carries only suggested value points for the answers. These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5.	The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6.	Evaluators will mark (√) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓) while evaluating which gives an impression that answer is correct and no marks are awarded. This is most common mistake which evaluators are committing.
7.	If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.

8.	If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
9.	If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note “Extra Question” .
10.	No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
11.	A full scale of marks _____ (example 0 to 80/70/60/50/40/30 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
12.	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
13.	Ensure that you do not make the following common types of errors committed by the Examiner in the past:- • Leaving answer or part thereof unassessed in an answer book. • Giving more marks for an answer than assigned to it. • Wrong totaling of marks awarded on an answer. • Wrong transfer of marks from the inside pages of the answer book to the title page. • Wrong question wise totaling on the title page. • Wrong totaling of marks of the two columns on the title page. • Wrong grand total. • Marks in words and figures not tallying/not same. • Wrong transfer of marks from the answer book to online award list. • Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.) Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14.	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
15.	Any unassessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16.	The Examiners should acquaint themselves with the guidelines given in the “Guidelines for spot Evaluation” before starting the actual evaluation.
17.	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
18.	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

General instructions:

- a. The marking scheme carries only suggested value point for the answers.
- b. These are only guidelines and do not constitute the complete answer.
- c. The student can have their own expression and if the expression is correct, the marks be awarded accordingly
- d. The candidates would be permitted to obtain a photocopy of the answer book on request on payment of the prescribed processing fee. All evaluator /Additional head examiners/Head examiners are once again reminded that they must ensure that evaluation is carried out as per value point for each answer as given in the marking scheme.
- e. All Head examiners/Additional head examiners/Evaluators are instructed that while evaluating the answer book if the answer found to be totally incorrect, (X) should be marked on the incorrect answer and awarded '0' marks.

Set 75/S

MARKING SCHEME PHYSICAL EDUCATION

Q. No.	Expected Answer / Value Points	Distribution of Marks
	SECTION A	
1.	(A) Previous performance	1
2.	(A) $\frac{NB + 1}{2}$	1
3.	(B) Increase in heart rate	1
4.	(A) Vakrasana – (Visually Impaired) (C) Makarasana	1
5.	(A) Paralympic games	1
6.	(A) Primary Amenorrhea	1
7.	(B) Both (A) and (R) are true and (R) is not the correct explanation of (A).	1
8.	(B) 2.3 kg	1
9.	(C) Upper body flexibility	1
10.	(B) a-ii, b-iii, c-i, d-iv	1
11.	(A) Back bend in standing position	1
12.	(C) (A) is true, but (R) is false.	1
13.	(C) 180 minutes	1

14.	(B) a-ii, b-i, c-iv, d-iii	1
15.	(D) Submissiveness	1
16.	(C) Extrovert	1
17.	(B) 3 to 10 days	1
18.	(C) Ballistic method	1
	SECTION B	
19.	Explain the correct breathing pattern while performing Nadi – Shodhana Pranayama.	
Ans.	1. Place right hand in Pranayama mudra. Close the right nostril with the right thumb. Inhale through the left nostril for 5 counts. 2. After 5 counts of breath, release the pressure of thumb from the right nostril and close the left nostril with ring finger. 3. Exhale through the right nostril for 10 counts, keeping the respiration rate slow, deep and silent. Then, inhale through the right nostril for 5 counts and the procedure continues. 4. Make sure that no sound is produced as the air passes through the nostrils.	2
20.	What do you understand by menstrual dysfunction? Write in brief.	2
Ans.	Menstrual dysfunction is an abnormal condition in a woman's menstrual cycle. Normal range of menstrual cycle is 21 to 35 days. If it happens earlier than 21 days or after more than 35 days then it's a problem. OR	

	It can also include missing 3 or more periods, heavier or lighter menstrual flow in comparison to usual, cycle happening longer than 07 days, painful menstruation or bleeding after menopause.		
21.	‘Roughage is an essential component for our body. ‘Explain the statement by enumerating the functions of roughage.		1+1= 2
Ans.	1. Roughage improves digestion 2. Promotes gut health 3. Reduces risk factor of heart disease 4. Manages weight and blood sugar 5. Reduces bowel irritation 6. Helps in keeping the digestive system clean. 7. Prevents constipation and helps release faecal matter. 8. Satisfies appetite 9. Softens stool (Any 2 functions)		
22.	What is the purpose of the abdominal partial curl up test?		2
Ans.	Abdominal partial curl up – Measures abdominal /core strength and endurance.		
23.	Differentiate between Extroverts and Introverts.		1+1=2
Ans.	Extroverts 1. Social, outgoing, confident, lively and make friends easily. 2. They are generous, supportive and courageous.	Introverts 1. Reserved, too self-conscious, more interested in own thoughts and ideas. 2. They are self-centred unable to adjust easily in society.	

	3. They are action oriented. 4. Group leaders, politicians, heads, actors are extroverts generally.	3. They think before acting. 4. Poets, artists, philosophers, writers etc. are usually introverts	
	(Any 02 differences)		
24.	Write any two physiological factors to determine strength.		2
Ans.	Physiological factors to determine strength: 1. Muscle composition (Slow and Fast Twitch fibres) 2. Size of muscle 3. Body weight 4. Intensity of nerve impulse 5. Muscle coordination (Any 02 points)		
	SECTION C		
25.	Differentiate between Knock-out and League Tournament.		1x3=3
	Knockout 1. Player/Team continue to play matches until being defeated 2. Good Teams/Players can be eliminated at early stages 3. It is less expensive	League 1. Player/team will get equal chance to play with each other. 2. The true winner emerges from this format 3. It is more expensive	

	4.Requires less time 5.Team/Player have to give consistently their best performance to avoid elimination 6. Seeding procedure can be used in this format. 7. Other name for this format is Elimination tournament	4. Requires more time 5. More chances for team/players to showcase their performance. 6. No provision of seeding 7. Other name for this format is Round Robin Tournament.	
	(Any 03 differences)		
26.	Explain any two common postural deformities with their corrective measures.		1.5+1.5=3
Ans.	Postural Deformities 1. Knock knees 2. Flat foot 3. Round shoulders 4. Bow legs 5. Lordosis 6. Kyphosis 7. Scoliosis Knock knees Knock knees is a postural deformity in which the legs are bent inward and knees strike each other while walking or running and there is a wide gap between the ankles. It is also known as Genu Valgum Corrective measures: 1. Horse riding 2. Perform Padmasana and Gomukhasana 3. Outward walking 4. Keep a pillow between the knees and stand erect for some time. Flat foot: Flat foot is also known as pes planus or fallen arches. When the arch of the foot is lesser than normal, it is known as flat foot.		

	Corrective measure: 1. Walk bare footed over the sand 2. Perform rope skipping 3. Picking up marbles with toes 4. Perform Adhomukhasana and Vajrasana. (explanation and relevant corrective measure of any 2 enlisted postural deformities)	
27.	What is the purpose of conducting the Sit and Reach Test? Write the procedure of conducting this test.	1+2=3
Ans.	Sit and Reach: Purpose: Common measure of flexibility, and specifically measures the flexibility of the lower back and hamstring muscles. Procedure: 1. This test involves sitting on the floor with legs stretched out straight ahead. 2. Shoes should be removed. 3. The soles of the feet are placed flat against the Sit and Reach box. 4. Both knees should be locked and pressed flat to the floor - the tester may assist by holding them down. 5. The subject extends hands to reach the measuring scale without bending for initial reading. 6. With the palms facing downwards, and hands on top of each other, the subject reaches forward along the measuring line as far as possible for final reading. 7. Ensure that the hands remain at the same level, not one reaching further forward than the other. Make sure there are no jerky movements.	
28.	Enlist any two asanas for back pain and explain the procedure of any one asana.	1+2=3
Ans.	Asana for Back-pain: 1. Tadasan 2. Urdhwahastottanasana 3. Ardh – Chakrasana 4. Ushtrasana 5. Vakrasana 6. Saral Matsyendrasana 7. Bhujangasana	

	8. Gomukhasana 9. Bhadrasana 10. Makarasana Procedure of Tadasana: 1. Stand with feet together or about 10 cm apart hands by the side of the thighs. 2. Distribute weight equally on both the feet to keep the body steady. 3. Raise arms over the head. Interlock the fingers and turn the palms upward. 4. Inhale and stretch the arms, shoulders and chest upward. 5. Raise heels, coming up onto the toes. 6. Hold the breath and the position for a few seconds. 7. Lower the heels while breathing out and bring hands down. (Enlist any two asanas and explain the procedure of any one from the list provided.)	
29.	What types of physical impairments are considered for grouping the athletes for Paralympics?	1x3=3
Ans.	Physical Impairment – There are eight different types of physical impairment: 1. Impaired muscle power –The force generated by muscles, such as the muscles of one limb, one side of the body or the lower half of the body is reduced. 2. Impaired passive range of movement – Range of movement in one or more joints is reduced. 3. Loss of limb or limb deficiency – A total or partial absence of bones or joints from partial or total loss 4. Leg-length difference – Significant bone shortening occurs in one leg. 5. Short stature – Standing height is reduced 6. Hypertonia – Hypertonia is marked by an abnormal increase in muscle tension and reduced ability of a muscle to stretch. 7. Ataxia – Ataxia is an impairment that consists of a lack of coordination of muscle movements 8. Athetosis – Athetosis is generally characterized by unbalanced, involuntary movements and a difficulty maintaining a symmetrical posture (any 3 impairment from the list)	

30.	Why are the angles of release for Shotput, Javelin and Discus Throw different? Explain.	3
Ans.	1. Due to shape of the equipment the aerodynamics play a role in the angle of release. 2. Difference in throwing action or style leads to different angle of release. 3. Difference in the weight of the equipment, angle of release is different.	
	SECTION D	
31.	(i) (B) Knock out Tournament	1X4=4
	(ii) (C) 21	
	(iii) (A) It takes less time	
	(iv) (D) $\frac{NB-1}{2}$	
32.	(i) (A) 1924	1X4=4
	(ii) (C) 6	
	(iii) (A) 1	
	(iv) (C) 2003	
	(For Visually impaired)	
32.	(i) (B) Use of Standard equipment only	1X4=4
	(ii) (A) Increasing interaction among CWSN	
	(iii) (C) From an Indoor activity	
	(iv) (A) Simple to complex activity	
33.	(i) (A) Lack of warming up	1X4=4
	(ii) (C) Sprain	
	(iii) (C) Contusion	

	(iv) (D) Greenstick Fracture																			
	SECTION E																			
34	Vitamins are divided into two different categories. Enlist them and explain any two vitamins with their deficiency diseases.	1+2+2=5																		
Ans.	Vitamins: Fat Soluble: Vitamin A, Vitamin D, Vitamin E, Vitamin K Water Soluble: Vitamin B and Vitamin C <table border="1"> <thead> <tr> <th>Vitamin</th><th>Function</th><th>Deficiency</th></tr> </thead> <tbody> <tr> <td>Vitamin A</td><td>Helpful in formation of bones and teeth, promote normal vision</td><td>Night blindness, Keratomalacia, Xerophthalmia</td></tr> <tr> <td>Vitamin D</td><td>Helps in absorption of calcium and phosphorus</td><td>Rickets, Osteomalacia, Osteoporosis, Tetnay, Dental Cavities.</td></tr> <tr> <td>Vitamin E</td><td>Keep skin healthy, maintain normal functioning of reproductive organs.</td><td>Alzheimer's Paralysis, Slow Growth</td></tr> <tr> <td>Vitamin K</td><td>Prevention of hemorrhage and excessive bleeding in wounds</td><td>Anemia, Blood Does Not Clot</td></tr> <tr> <td>Vitamin B1 (Thiamin)</td><td>Helps in metabolizing carbohydrate, maintain health of liver, kidney etc.</td><td>Beri-Beri</td></tr> </tbody> </table>	Vitamin	Function	Deficiency	Vitamin A	Helpful in formation of bones and teeth, promote normal vision	Night blindness, Keratomalacia, Xerophthalmia	Vitamin D	Helps in absorption of calcium and phosphorus	Rickets, Osteomalacia, Osteoporosis, Tetnay, Dental Cavities.	Vitamin E	Keep skin healthy, maintain normal functioning of reproductive organs.	Alzheimer's Paralysis, Slow Growth	Vitamin K	Prevention of hemorrhage and excessive bleeding in wounds	Anemia, Blood Does Not Clot	Vitamin B1 (Thiamin)	Helps in metabolizing carbohydrate, maintain health of liver, kidney etc.	Beri-Beri	
Vitamin	Function	Deficiency																		
Vitamin A	Helpful in formation of bones and teeth, promote normal vision	Night blindness, Keratomalacia, Xerophthalmia																		
Vitamin D	Helps in absorption of calcium and phosphorus	Rickets, Osteomalacia, Osteoporosis, Tetnay, Dental Cavities.																		
Vitamin E	Keep skin healthy, maintain normal functioning of reproductive organs.	Alzheimer's Paralysis, Slow Growth																		
Vitamin K	Prevention of hemorrhage and excessive bleeding in wounds	Anemia, Blood Does Not Clot																		
Vitamin B1 (Thiamin)	Helps in metabolizing carbohydrate, maintain health of liver, kidney etc.	Beri-Beri																		

	Vitamin B2 (Riboflavin)	Helps in preserving and maintaining the characteristics of youth, tightness and smoothness of skin.	Cheilosis
	Vitamin B3 (Niacin)	Helps on the growth of the body	Pellagra Grey Hair
	Vitamin B5 (Pantothenic acid)	Helps in maintaining the body weight	Burning Feet
	Vitamin B6 (Pyridoxine)	Formation of haemoglobin and keeps the skin healthy	Dermatitis Glossitis
	Vitamin B7 (Biotin)	Helps in converting certain nutrients into energy. It also plays an important role in the health of your hair, skin, and nails.	Hair Loss
	Vitamin B9 (Folic acid)	Essential for reproduction, growth and development of body	Loss of Leucocytes (WBC)
	Vitamin B12 (Cobalamin)	Plays an essential role in the production of Red blood cells and DNA, as well as the proper functioning of nervous system.	Anemia
	Vitamin C	Helps in healing the wounds, increase metabolic rate, helpful in absorbing calcium.....	Scurvy
(One function and one deficiency disease of any 2 vitamins from the list provided/ or any relevant function or disease)			

35.	Define Friction. What are the advantages and disadvantages of friction in the field of games and sports? Explain with suitable examples.	1+2+2=5
Ans.	Friction is a force acting over the area of contact between two surfaces in the direction opposite to that of motion. OR Friction is a force that acts parallel to the two surfaces. OR In other words, it is a force that resists the movement. (Any other relevant definition) Advantages: 1. Running and walking are the result of friction between ground and the shoes. For e.g.: An athlete uses spikes and a footballer uses studs. 2. The grip in Badminton and Tennis play a major role in performing a perfect shot. That is why a good grip is used for better friction. 3. The friction between the tyres and the surface prevents cyclist from slipping and skidding. Also, a cyclist uses a pointed helmet to reduce friction. 4. Gymnasts and Javelin thrower use Magnesium powder to increase friction. Disadvantages: 1. If the air pressure in the cycle tyres is not appropriate, then due to excessive friction, more energy is used. 2. Flight of an object also depends on friction because air resistance slows down the speed of the projectile. 3. During Pole-Vault, an athlete may lose grip on the pole if less friction is there between palm and pole and may get injured. 4. Friction can cause injuries because a player slides across the ground during play. (Any two advantages and disadvantages or relevant answer)	

36.	What is the need for Inclusive education in India? What measures can be taken for the effective implementation of inclusive education?	2+3=5
Ans:	Strategies: Need of Inclusive Education.	
	1. Build Self Esteem 2. Improve social skills 3. Enhance sensitivity 4. Create better understanding 5. Create sense of belongingness 6. Enhance Academic part Measures : 1. Equipping teachers 2. Developing support by involving stakeholders. 3. Curriculum transaction 4. Designing class CWSN friendly 5. Developing education goals. 6. Right to education (Explain any 02 needs and any 03 measures)	
37.	What is Speed? Explain any two methods of Speed development.	1+2+2=5
Ans.	Speed: Capability of the body to perform successive movement at fastest rate. OR Ability to execute motor movements as quickly as possible. Method of Speed Development 1. Acceleration runs Method used to develop speed while attaining maximum speed from a static position. A sports person is required to run a specific distance, gain maximum speed at the earliest and finish the	

	specified distance at that speed. These runs are repeated with sufficient rest in between. No of acceleration runs should be set as per age, capacity and fitness of the athlete. 2. Pace runs Running a set distance at uniform speed. Usually includes races of 800mts and above. It is important to keep pace in mind when running middle and long distance races. In the beginning of the race, the pace should not be too high and pace should be maintained throughout. Repetition of pace runs can be done as per level of athlete. (Any relevant definition and explain 2 methods)
